

FSAddon's
Tongass Fjords

**More Cabins
on
Prince of Wales Island**

By Hans-Christian

Introduction

With this scenery I want to say “**Thank You!**” to

Holger Sandmann, for his incredible sceneries “Tongass Fjords” and “Misty Fjords” and his never ending support. Never thought that “Clarence Strait” or “Behm Canal” could mean a thing to me.

Bill Womack, who not only created the airports for “Tongass Fjords”, but all the carefully designed objects and airfields for “Tongass-“, “Misty Fjords”, “Freight Dogs – The Scenery” and “FsCargo”. The great cabins and all the objects I used within here, where created by Bill.

François Dumas, who is riding a “Gummikuh”, for his unbelievable friendly customer support, full of patience and for the great idea of “FsCargo”.

Larry Silsbee, who created the birds for “Tongass Fjords”. His seagulls fly around in this scenery.

All of “Misty Mooring Inc.”, for their great website, the huge load of sceneries, charters, trip tix and links. Thank you for sharing.

Hawkeyez, who is supporting powerful the whole community with the modern and clear styled new “Tongass Wild” website. Here you can find almost anything regarding the Tongass area.

Emmett McRobie, Jaap van Hees and Andy Sedgley for the great work they have done not least with the Tongass cargo areas. I love your readme.pdf, especially the words you have found in the introduction! This way my AFCAD-files should be used too. ☺

And last but not least,

All The guys from the German “Bush Pilots” website, I am one of the unknown users. Thank you for sharing your knowledge and your resources with me. With your help I started to know, what bush flying is all about. Your “Misty Fjords” map still covers my floor.

Credits

First of all I want to thank **Grommit** and **Jaap van Hees** !

I met them at the Tongass support forum and they spontaneous promised to test my scenery. They scrutinized each cabin closely and with their helpful feedback I was in a position to modify or change things. I enjoyed our coöperation. You were great!

Jaap van Hees also created the layout and converted my word.doc into the pdf file you are now reading. Most of the screenshots within here were contributed by Jaap. This was far more as I expected!

Van harte bedankt !

Contents

With this scenery you get the 12 “Tongass National Forest Recreation Cabins” on Prince of Wales Island, left out in Misty and Tongass. So you will have all Tongass National Forest cabins on this island. In addition there are 2 small campsites and a parking area to start a canoe tour.

For placing the cabins, the campsites and the parking area, I used the descriptions and maps of “The Tongass National Forest Recreation Cabins” website and Topo map.

For each cabin I created a simple AFCAD file, to have a starting point at the cabins. As the cabins don’t have an official ICAO code, I took a fictional Code: “MC<number>” If the starting point doesn’t fit with your needs, you can change this with Lee Swordys AFCAD tool.

For those, who have FsCargo installed, cargo areas are provided.

Please have in mind, that the FsCargo areas might be a little bit misplaced on your system. It depends on the settings. With the Cargo Editor you can easily correct this.

Apart from my scenery you will find a Patch for Lake Galea (Honker Lake Cabin) made by Holger Sandmann. It makes the lake flat.

Requirements

This scenery is an addition **only for Misty- and Tongass Fjords (FS2004)** by **FSAddon**.

So you **MUST HAVE** installed both sceneries.

Without “Tongass Fjords” you will see nothing!

If you only have “Tongass Fjords” installed, the cabins in the south-eastern part of Prince of Wales Island (covered by “Misty Fjords”) will not show up correctly.

Also required is “**Freight Dogs – The Scenery**” by **FSAddon** .

If it is not installed on your computer, you will miss some smaller objects (fireplaces, the campsites, and the outhouse toilet)

No additional libraries are needed.

How to find the cabins

First you can use the map of Prince of Wales Island, which comes with “Tongass Fjords” to find your way. But not all of the National Forest cabins can be found there and sometimes the map does not show the correct location.

For closer information go to the National Forest website
www.fs.fed.us/r10/tongass/cabins/pow_map.shtml.

You will find a map with all cabins. With left-click on the cabins name you will get all information for that specific cabin, including a small chart of their vicinity.

The Cabins

- | | |
|-------------|--|
| MC01 | Salmon Bay Lake Cabin |
| MC02 | Red Bay Lake Cabin |
| MC03 | Shipley Bay Cabin |
| MC04 | Sarkar Lake Cabin |
| MC05 | Sweetwater Lake Cabin (parking area for starting canoe tours at the south end of the lake; sometimes they burn fires there too) |
| MC06 | Honker Lake Cabin (On some charts Honker Lake is named “ Lake Galea ”!) |
| MC07 | Staney Creek Cabin (with Horseshoe Hole and Staney Bridge Campsites) |
| MC08 | Salmon Lake Cabin |
| MC09 | Karta lake Cabin |
| MC10 | Karta River Cabin (Watch out, landing on Karta River can be dangerous!) |
| MC11 | Trollers Cove Cabin |
| MC12 | Josephine Lake Cabin |

Installation

1. The folder "MC_Prince Of Wales" goes to the FS9/Addon Scenery folder. Add it to the FS9 scenery library, placed above Tongass and Misty Fjords.
2. Start FS9, do nothing and just close the program again. Now the scenery.cfg should be updated.
3. Go to the FS9 main folder and open the scenery.cfg with a text editor. Search for the entry "MC_Prince Of Wales".

Copy and paste the lines from "Flatten.txt" under the MC_Prince Of Wales entry. It should look like this:

```
[Area.XXX]
Title=MC_Prince Of Wales Island
Active=TRUE
Layer=XXX
Local=Addon Scenery\MoreCabins Prince Of Wales Island
Flatten.0=40,N55 21.93,W132 11.82,N55 21.93,W132 11.81,N55 21.92,W132 11.81,N55
21.92,W132 11.82
Flatten.1=30,N55 49.27,W133 9.22,N55 49.26,W133 9.19,N55 49.19,W133 9.19,N55
49.19,W133 9.22
Flatten.2=80,N55 49.26,W133 9.17,N55 49.25,W133 9.15,N55 49.20,W133 9.15,N55
49.20,W133 9.17
```

(where „XXX“ is the number in your scenery.cfg)

4. Put the content of the folder AFCAD (12 Af2.bgl files, MC01 – MC12) into the Folder FS9/Addon Scenery/Scenery, or where you usually place them.

5. Installation of the patch for Lake Galea

Open the zip file “0_TF_water_W3_Lake_Galea_patch_LWM2.zip”.
Inside you will find a bgl file with the same name.

This bgl has to go to the scenery folder within **Tongass Fjords Scenery** (NOT Tongass Fjords Landscape)

So this will be the path:
FS9/FSAddon/Tongass Fjords Scenery/Scenery

6. For users of FsCargo only

If you have the payware program “FsCargo” by FS-ADDON installed, and you want your cabins to be supplied with people, camping gear, or fuel for the stove,
Go to FS9/Vistamare/FsCargo
open the folder “FsCargo” and
put the “Cra1Prince of Wales.CFG” into FS9/Vistamare/FsCargo/Worlds

7. Close this document, start your weather machine, fire up FS9, grab a floatplane and takeoff.

Known Issue: Two smoke emissions coming out of the roof of the Salmon Lake cabin.
This very old cabin is unique. I tried to preserve a little bit of the impression for that cabin.
So I assembled two cabins for this one. This is the reason for the two smoke effects. You will have to live with it, as I cannot fix this.

I hope you have as much fun, as I had creating this thing.
Happy Cabin-flying! “But the weather...” ☺

This scenery is freeware; you use it on your own risk.

For suggestions and comments or if you detect obvious mistakes, feel free to contact me.
Please do not upload this scenery to any other site without my permission.
Thank you.
